Mobile workers need seamless access to communication and information services on portable devices. However current solutions overwhelm users with intrusive and ambiguous notifications. In this paper, we describe scaleable auditory techniques and a contextual notification model for providing timely information, while minimizing interruptions. Users actions influence local adaptation in the model. These techniques are demonstrated in Nomadic Radio, an audio-only wearable computing platf ...

Keywords: adaptive interfaces, auditory I/O, interruptions, notifications, passive awareness, wearable computing

Social activity indicators: interface components for CSCW systems

Mark S. Ackerman, Brian Starr

December 1995 Proceedings of the 8th annual ACM symposium on User interface and software technology

Full text available: pdf(1.07 MB)

Additional Information: full citation, references, citings, index terms

Keywords: CSCW, awareness, computer-supported cooperative work, human-computer interfaces, information systems, social activity, user interfaces, visualization

3 Remote usability evaluation: user participation in the design of a Web-based email service

David R. Millen

April 1999 ACM SIGGROUP Bulletin, Volume 20 Issue 1

A case study is presented in which remote usability evaluation methods were used in the

development of a new Internet service. The new service provided access to email using a standard web browser. User session logs, which included keystroke level event records, were examined for approximately 600 of the service trial users. This allowed temporal and activity analysis of user behavior, as well as the detection of general session usage patterns. In addition to keystroke level data, feedback about ...

4 Interactive posters: PhoneMan: the benefits of personal call histories David Millen, Don Henderson April 2000 CHI '00 extended abstracts on Human factors in computing systems

Full text available: pdf(202.65 KB) Additional Information: full citation, abstract, references, citings

In the PhoneMan research project we are exploring IP-based telephony control, new telephony interfaces, and non-traditional ways of merging telephony, messaging and alerting. The PhoneMan application allows complete control and monitoring of an ISDN desktop phone from a local PC and remotely from the web. Current features include enhanced screen pops, which can be configured to query local or remote directories, including corporate directories and public white page services, and email call notif ...

Keywords: auditory user interface, digitized speech, interactive voice response, speech synthesis

10 ENO: synthesizing structured sound spaces

Michel Beaudouin-Lafon, William W. Gaver

November 1994 Proceedings of the 7th annual ACM symposium on User interface software and technology

Full text available: pdf(1.02 MB)

Additional Information: full citation, abstract, references, citings, index terms

ENO is an audio server designed to make it easy for applications in the Unix environment to incorporate non-speech audio cues. At the physical level, ENO manages a shared resource, namely the audio hardware. At the logical level, it manages a sound space that is shared by various client applications. Instead of dealing with sound in terms of its physical description (i.e., sampled sounds), ENO allows sounds to be presented and controlled in terms of higher-level descriptions of sources, int ...

11 Improving Network Operations With Intelligent Agents

Nathan J. Muller

July 1997 International Journal of Network Management, Volume 7 Issue 3

Full text available: pdf(314.75 KB) Additional Information: full citation, abstract, index terms

Automating network and system management tasks has never been easier, since the advent of intelligent agents. This article describes the uses and advantages of intelligent agents, to identify and resolve problems locally, instead of dispatching technicians to remote locations, which is both expensive and time‐ consuming. © 1997 John Wiley & Sons, Ltd.

12 The design of an interactive online help desk in the Alexandria Digital Library Robert Prince, Jianwen Su, Hong Tang, Yonggang Zhao

March 1999 ACM SIGSOFT Software Engineering Notes, Proceedings of the international joint conference on Work activities coordination and collaboration, Volume 24 Issue 2

Full text available: pdf(1.53 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> <u>terms</u>

In large software systems such as digital libraries, electronic commerce applications, and customer support systems, the user interface and system are often complex and difficult to navigate. It is necessary to provide users with interactive online support to help users learn how to effectively use these applications. Such online help facilities can include providing tutorials and animated demonstrations, synchronized activities between users and system supporting staff for real time instruction ...

13 <u>Securing a global village and its resources: baseline security for interconnected signaling system #7 telecommunications networks</u>

Hank M. Kluepfel

December 1993 Proceedings of the 1st ACM conference on Computer and communications security

Full text available: pdf(1.19 MB)

Additional Information: full citation, abstract, references, index terms

The resulting national focus on Network Integrity issues, spawned the development of an industry commitment to affect and realize a minimum security baseline for interconnected SS7 networks. In addition the affected carriers in those outage have accelerated their pursuit of secure solutions to today's intelligent networking.[2]This paper will focus on the development of the baseline and the current effort to take the baseline into national, e.g., National Ins...

14 Ethical issues related to internet development and research

15 Ethical issues related to Internet development and research

M. Dee Medley, Rebecca H. Rutherfoord, G. Ernest Anderson, R. Waldo Roth, Stuart A. Varden December 1998 **ACM SIGCSE Bulletin**, Volume 30 Issue 4

Full text available: pdf(1.65 MB)

Additional Information: full citation, abstract, index terms

This paper discusses ethical issues concerning Internet development, presentation and research. A brief overview of the major ethical issues related to computing is followed by a discussion of ethical issues specific to the use of the Internet. We will look at the implications of these issues for particular population groups such as children, women, disabled persons, and the low socio-economic class. Finally, we offer suggestions for how these issues can be brought into the computer or informati ...

17 An introduction to data warehousing: what are the implications for the network? Katherine Jones

February 1998 International Journal of Network Management, Volume 8 Issue 1 Full text available: pdf(145.35 KB) Additional Information: full citation, abstract, references, index terms

Data warehousing is an information systems environment, rather than a product. It has emerged as an essential business entity for sophisticated analysis of data. This article presents a clear overview of the implications of data warehousing for business. © 1998 John Wiley & Sons, Ltd.

18 Unlinkable serial transactions: protocols and applications

Stuart G. Stubblebine, Paul F. Syverson, David M. Goldschlag November 1999 ACM Transactions on Information and System Security (TISSEC), Volume 2 Issue 4

Full text available: ndf(184.87 KB)

Additional Information: full citation, abstract, references, citings, index terms, review

We present a protocol for unlinkable serial transactions suitable for a variety of networkbased subscription services. It is the first protocol to use cryptographic blinding to enable subscription services. The protocol prevents the service from tracking the behavior of its customers, while protecting the service vendor from abuse due to simultaneous or cloned use by a single subscriber. Our basic protocol structure and recovery protocol are robust against failure in protocol termination. ...

Keywords: anoymity, blinding, cryptographic protocols, unlinkable serial transactions
